### About This Game

Crawlers and Brawlers is a RPG descended from the 8bit classics. It has you choose between three different classes to become an adventurer and go on a fantastic journey through many epic procedurally generated dungeons. Collect powerful loot on your way to develop your character with nothing to stand in your way of being exactly what you were meant to be, AWESOME. Join your friends in local or online co-op crawls through the dungeons then brawl online on 12 different multiplayer maps after you're so powerful no dungeon can contain you.

- Three different classes; warrior, mage and cleric.
- Collect loot to make your character more powerful.
- Hundreds of procedurally generated dungeons.
- An engaging single player campaign.
- Online multiplayer with up to 16 players on 12 multiplayer maps.
- Two, three, and four player local split-screen co-op.

---

# Procedural Dungeons

Explore hundreds of procedurally generated levels in 11 unique dungeons.

# Epic Loot

Collect loot from your enemies corpses to become more powerful.

# Online Deathmatch

---

Play online co-op or brawl with up to 16 players on 12 different multiplayer maps.

Anyone still play this?. A very satisfying gaming experience - especially from an RPGMaker game! Pale Echoes really differentiates itself with it's unique battle system, player choices and lore (I love the ingame Lexicon). You can tell the developer really enjoyed creating this world.. You get to help 7 girls become idols while doing so laying them in bed.. An interesting little metroidvania, inspired by a literary quote, that delivers a unique experience.

While this game is certainly not for everyone, I enjoyed it quite and bit, and at 5 bucks, it is certainly worth the price of admission.

Be warned, however, the combat is simplistic, there is not a great deal of enemy variety, there are sound effects but not music, and the experience itself is a short one (I completed the game in about 2 hours.) The ending is also not what you will be expecting, although I found it interesting. For less than the cost of lunch, I'd recommend giving it a try.. What everyone on here fails to say, is that EVE has been here doing what it does for 15 years in an MMO landscape that was dominated by many other MMO's of its time and it was never WoW or Aion or w/e u would like to call the game breaking records for pvp and or even coming close to a story that the EVE universe has wrote over and over again with its players creating them... just one of these EVE wars is more of a story and background then any other MMO has released IN THE LAST 15 years in and of itself. Yes its tough and u have no idea of what a grind is BUT, the satisfaction u get from starting mining, or rippin off that scrubs head and his buddies cause they thought they could gank you... its so \u2665\u2665\u2665\u2665in satisfying. No, game achieves this in any amount at all in terms of achieving something that you busted ur\u2665\u2665\u2665\u2665off to get. So, yea i am a EVE guy but if you come on here and do nothing but read of the people who got ganked and quit then you are sadly missing the point and dont need to listen to them. My advice play and join a corp all the while looking for a null sec group to fit yourself into... this is a team game at the big boy level u can only fly solo for so long. See you later future capsuleers.. Get the fu@k out of here, my old dilapidated heart cant take this♥♥♥♥♥ Graphics, music and trial and error gameplay straight out of hotline miami.

POTATO PIZZA!. Hard, but great missions addon for 8 euro in sale, great buy !!!!

Fligh simulator isnt for mainstream nabs, but for the pilots, No ATC but u will fly by gps and land with a nice approaches ! If u know ISL, GPS and your NAV LOG it\u00b4s ok.. fun little game, more of a VR experience. i enjoyed walking around and spotting the little animals. i got queasy flying around though and had to stop playing- the movements weren't quite jelling and i felt a little sick moving too fast. imho something that "grounds" the player might be helpful- like sitting a laiktu (sp) style cloud?

i'd avoid this if you get motion sick easily.. I really enjoyed this its much better than the first as there is a lot more to do deliver workers which produce wood and then take wood to the lumber mill to make planks of wood and then to the paper mill.

It reminded me of Railroad Tycoon but there is no business management.

It took me 75 hours over 2 weeks to complete this game so it is value for money and entertainment.. Absolutely wonderful product.

If you're careful about your focal distance not changing and take plenty of pictures, you'll get great results!. Getting an Achievement may be the first thing you do in this game. That pretty much sets the tone. This is very simple in all ways. You literally point and click, there are no alternate functions for the mouse. The inventory does allow you to combine a couple of things, but it is so simple and small it is part of the control panel. The characters are mostly silly in unamusing ways. Most of the map areas have one thing to do and then are just travel space. That makes this game really short. Neither the greater story nor the action in the game was interesting or appealing. I played it until all the Steam cards dropped and now feel I have no reason to play it again.

If you bother to investigate everything and every line of dialogue, as would be standard in a good adventure game, you can find a very long speech about the setting in general and the Order of the Thorne (insert over-dramatic eighties music here. sigh) in particular. At the end it has a blurb for the next game that you cannot click past. That makes this feel like an ad rather than something to buy. That's my recommendation on this game: it's a big ad, get it on sale if you really feel you have to get it at all.
